1. Introduction

Oracle Receivables processes invoices, receipts and maintains customer records. Oracle Receivables (or “AR”) uses these functions to create journal data that is then imported into Oracle General Ledger.

This document describes the specific local business processes applicable individual subsidiary operations, as well as on the cross-organization levels, in order to facilitate the Accounts Receivable functions of the business.

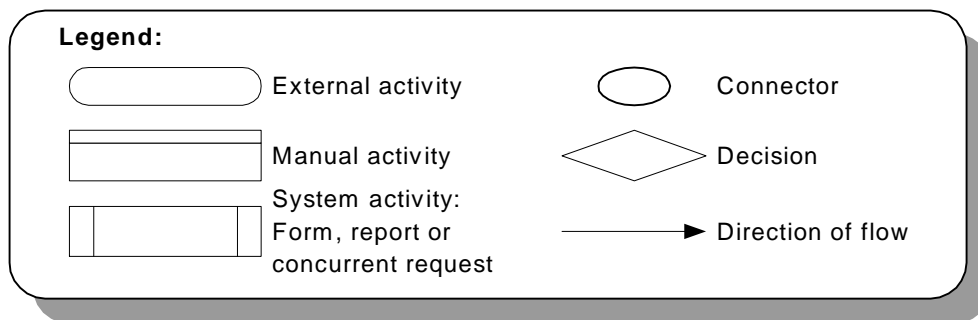

New business processes or additional process changes shall be engineered to leverage on Oracle standard functionalities.

2. Document References

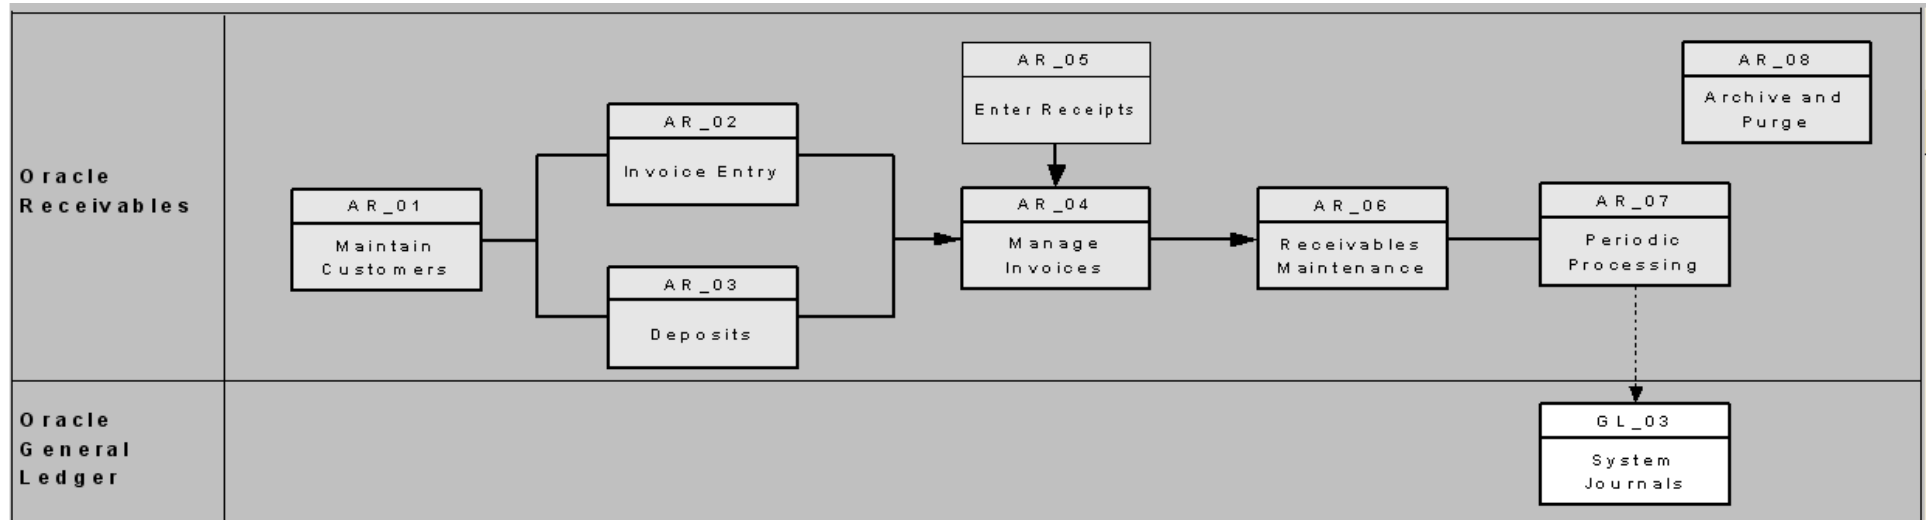

The business processes detailed are in reference and conformance with the Statement of Requirements. The reference documents include:

Document Name	Version
Business Scenarios, Accounts Receivable (AR)	XX
